Florida International University’s Online Master of Science in Engineering Management offers a fast-track to engineering leadership by developing managers who understand both the engineering and business aspects of technology. With FIU’s fully online program, you can advance your engineering career with our flexible program that combines technical, law and business courses. The customized, state-of-the-art applied management curriculum includes courses in Total Quality Management (TQM), engineering project management and business law taught by distinguished faculty experts. Core engineering management courses equip students with the ability to exercise sound judgment on the legal aspects of an engineering issue, the body of total quality management (TQM) knowledge required for the six sigma black belt certification, and the body of engineering project management knowledge required for the project management professional (PMP) certification.

The TQM course provides students with the body of knowledge required for the Six Sigma Black Belt certification. Students are also well prepared for certifications as a Project Management Professional.
