FIU Online
Florida International University
FIU's online Bachelor of Science and Computer Engineering offers education that will help form the building blocks for innovative digital invention and inspire new thoughts on the practical use of technology in any business sector. In specific, FIU’s online Computer Engineering students are trained in the areas of hardware architecture, software engineering, hardware-software integration, signal and image processing, instrumentation and filter design and computer networking. These areas form the foundation of the degree and incorporate contemporary instruction on technologies making the biggest impact on the field.

The program also teaches practical knowledge, logic and reasoning to help students identify new solutions for existing problems. Students will understand and be able to apply complex configuration and communication strategies that bring all of the knowledge, skills and abilities together to provide proper operations, maintenance and technical support within today’s modern organizations. Graduates will be ready to compete in an ever-advancing industry.
